**Subject:** Microsoft Settlement

I feel it is time to settle this case. Our Government has let our technology lead slip to Japan. All of the things Americans invented and excelled in such as televisions VCR s camera s microwave ovens automobiles stereo s machine tool s and many more. We have a lead on the World in software let us support and not destroy this. It appears a few States Attorney General are holding up this settlement to further their own political carriers. Microsoft produces the most productive software for our business and home use at favorable prices.Lets let them continue so that our businesses can continue to have the productivity lead we now enjoy.
